Mr. H. L. Smith has just returned from an extended trip to the markets of the East where he has been buying goods for Verbeck's Great Western Supply Store. That he has succeeded in picking up some great bargains is evidenced by the store's advertisement in this issue. The energy shown by this store in procuring bargains for the people and putting out goods at prices which make Wa-Keeney an economical market in which to buy goods second to none in Western Kansas, should be appreciated; and certainly will be by those who wish to see prosperity in our midst. The enormous business being done at this store is an evidence that much outside trade is being attracted to Wa-Keeney that formerly went elsewhere.

Last Friday evening Senator Harris telegraphed W. E. Baum that the home-steaders on the Ft. Hays Military reservation had lost out. This is tough on Wa-Keeney who spent their time and money improving their claims. But they say they have not given up hopes yet as will appeal to the courts, and it may take three to five years before this matter is settled.

W. C. Olson is out lecturer in the third commissioner district. He is appealing to the voters to stand by his candidate, Jim Yanda, because if Jim is not elected his paper (which had the printing for the past five years) will lose its pull at the public crib. He bailed a friend of ours the other day and gave him this tale of woe: "I wish you would help me out on the commissioner deal. You see, if Jim Yanda is beat my paper will lose the printing; The World has the land office notices, etc." Mr. Olson has been making this same talk for the last five years, and if his paper is a "public charge" and can't be run without county printing he had better sell out now for, sooner or later the voters will vote him out of office.

Latest News From the Gold Fields.

For over a week the investigations of the Gage gold mill at Smoky Hill City have been in progress, and so far, the results of the investigations have confirmed the representations of Mr. Gage and his co-laborers. The investigation is being made by J. T. Lovell, of Topeka, who is in the employ of R. T. Beatty, the Beaumont "oil king."

From one mill run made without the assistance and interference of Mr. Gage, Mr. Lovell secured \$12 per ton of gold and silver. Another mill run showed only \$1 a ton. This small showing was due, according to Mr. Gage, to the electric batteries, which had become weak and ineffective. Mr. Lovell is making extensive experiments, and will remain in Ellis county for some time.

The investigation has so far been made at the Gage mill, with the machinery and material used at the mill. The mill consists of a crusher, which reduces the shale to small lumps and powder. The crushed shale is dumped into three large vats, each holding 3,200 pounds. It is then subjected to the cyanide process, and in the course of 36 hours, the gold and silver is secured.

Mr. Beatty recently sold one of his Beaumont oil wells for \$1,300,000, and owns several other "gashears" of equal value. If the investigations of the Kansas shales now in progress prove that the Gage process is not a "fake," Mr. Beatty will within 30 days erect a 60 ton shale mill, and commence the reduction of the shale by the cyanide process. He will erect more mills as fast as the profits of the first warrant, and if the indications are favorable, the amount of gold secured is only limited by the capacity of the mills.—Topeka Journal.
